Newton Group

www.newton.cz

The NEWTON Group belongs among the largest financial non-banking groups in the Czech Republic. The NEWTON Group offers a large number of activities of investment banking from the administration of share and pension funds to the provision of consultancy and company management. At present the set of all offered services and their combination covers the sphere of investment brokerage (identification, analysis, evaluation and implementation of the acquisition of the investment opportunities) and subsequent development of the invested funds by means of interim direct management pursuant to the plan of the company development defined in advance. In particular, for the purposes of its clients' participation in the privatisation processes in the developing economies, the NEWTON Group creates custom-made optimised investment schemes, which help the clients to achieve their aims. The products of the NEWTON Group are represented by its individual business processes, providing a client with a significant added value within the course of the investment process.

Stenograph - USA

www.stenograph.com

Creating a searchable digital record of the spoken word is the cornerstone of Stenograph's success. With advancements in technology that include the wide use of wireless communications, the Internet, speech recognition, and audio synchronization, Stenograph has expanded the numerous benefits and number of prospects for its' technology tools. Within the last years, our products have been embraced in numerous new markets in all corners of the world. The latest technologies have been seen in parliaments, courts, television stations, and numerous Web casts. The commitment continues to create verbatim records of the spoken word in a timely manner.

ProCat - Usa

www.procat.com

ProCAT will be displaying both machine software, WinnerXp, and voice recognition software, WinnerVR. Both of these products include the ability to do captioning, CART, reporting and more. Also displayed will be the new ProCAT Stylus writer, which is the latest technology in stenography machines. With the Stylus you have on-board audio recording, paper or paperless, Windows operating system on the writer, wireless realtime feed with bluetooth, and much more.

Word Technologies, LLC and Advance Software, Inc. - USA

www.wordtechnologies.com

www.accucap.com

The *Tréal* shorthand keyboard by Word Technologies, LLC, provides an innovative and low-cost input solution for today's leading transcription software. Word Technologies, LLC, offers the industry's most advanced products for a wide range of language environments. The Tréal remains the input device of choice for many non-English languages including those right-to-left languages such as Arabic, Persian, Urdu and Hebrew.

Advantage Software, Inc., has for 20 years been the leader in innovation, productivity and intelligence in transcription software. Providing the most advanced capabilities in its *Eclipse* transcription and TV captioning software (*AccuCAP*), this software continues to be the 1st choice among reporters, stenographers and TV captioners around the world and is compatible with virtually any shorthand input device or speech engine ever made. The new *Passport* shorthand machine 'eclipses' all other input devices with its advanced optic technology and innovative design features. Technological leadership once again is the very cornerstone of ASI's product design.
